

Please DO NOT allow cellular phone use aboard airborne aircraft. I am a platinum flyer on NW. I am usually in the air just about every week and the peace and quiet is the best part of a flight that is cramped and uncomfortable. If you allow cell phone use it will contribute to passenger discomfort which will cause arguments and hostility among travelers, which is already bad enough. People will be getting mad about the loud person next to them on the phone because they won't be able to hear on their phone or they are tired of the noise. Cell phones on flights will be an absolute nightmare for most everyone aboard. Please, don't make planes more uncomfortable than they already are.
